My logo for Assignment 1 and the choices that led to this design

Marcu van Dyk

I am a very precise but scatterbrained person. I love and care about anything doing with technology. My goal is to become a respected and well earning programmer.

MY LOGO

#1

My first design choice

The “M” with the polo inside represents Marco polo (Marcu polo), who is a perfect example of how I live, I like exploring and finding new ways to do things.

My second design choice

I have a very scattered brain which negatively effects a lot of things I do but I’ve learned to control the madness into a somewhat controlled art that drives unique ideas.

#2

#3

My third design choice

I love music, so it made sense for me to add it to the logo. It helps me control my wild thoughts and keep me focused on my work and everyday tasks.

My last design choice

The circle encases all of the designs, show in the logo, signifying that it is who I am.

#4

My information

My name is (PCM) Marcu van Dyk, student no. 45333610, part of group: CMPG214-DC-2026SEM1. I have chosen the role of Customer Service Representative for assignment 2. Git hub link: https://github.com/marcupolo/CMPG214-Assignment-1
